The IUCT-Oncopole brings together the Institut Claudius Regaud (ICR), Toulouse University Hospital’s oncology departments (CHU), and the Cancer Research Center of Toulouse (CRCT) on a single site at the heart of the Oncopole campus, a cluster of public and private cancer organizations aimed at stimulating innovation and optimizing patient care.

IUCT-Oncopole is located in TOULOUSE, in the OCCITANIE Region:
- Midi-Pyrénées second largest region: 72,000 km², 5.8 million inhabitants
- France’s leading region for research: 30,000 researchers, 14 business clusters hosted or associated
- 35 “grandes écoles” and universities with 245,000 students
- Large corporations: Airbus, Safran, Thalès, Continental, Pierre Fabre

Member of the Organisation of European Cancer Institutes (OECl)

IUCT-Oncopole is part of a public-sector cancer research and treatment group whose work is shared between three sites: IUCT-Oncopole, IUCT-Purpan and IUCT-Rangueil/Larrey.

IUCT-Oncopole is located in TOULOUSE, in the OCCITANIE Region:
- Midi-Pyrénées second largest region: 72,000 km², 5.8 million inhabitants
- France’s leading region for research: 30,000 researchers, 14 business clusters hosted or associated
- 35 “grandes écoles” and universities with 245,000 students
- Large corporations: Airbus, Safran, Thalès, Continental, Pierre Fabre

More than 150 physicians
More than 34,000 patients treated every year
Mean length of hospital stay: 6.3 days
79% outpatient in the hospitalization units Healthcare units given an A rating by the HAS

More than 150 researchers

More than 150 clinical trials include patients every year
15% of patients (active files) included in trials
More than 560 scientific papers every year
15 patents every year

15,000 students

Establishment authorized to receive donations and bequests
1 foundation (Toulouse Cancer Santé)

306 beds - 94 day-hospital places
More than 105,000 hospital stays every year
More than 58,000 radiotherapy sessions every year

1,800 staff
160 physicians
150 researchers
1,000 students

TOULOUSE UNIVERSITY CANCER INSTITUTE–ONCOPOLE

IUCT-Oncopole

RESEARCH INNOVATION CARE

TOULOUSE – FRANCE
CLINICAL RESEARCH

Pioneering ISO 9001 certifications:
- Clinical trials unit (BEC) ICR
- Research and innovation department (DRI) CHU
- Hospital pharmacy and clinical trials (UPCO/UEC) IUCT-O

More than 1,900 patients are included in a trial every year (1,520 from IUCT-O)

75% of clinical research is academic research

52% of inclusions are within early phase trials (19% of which are phase I trials)

47% of patients are included in trials promoted by IUCT-O

750 clinical trials recruit patients every year

Methodology support center

Two teams provide project support: data management & bio-statistics (research partnership with Toulouse School of Economics).

1,100 new patients treated every year

More than 2,600 patients receiving oral therapies

79% of patients receive their treatment as outpatients

7 operating rooms, including 1 devoted to R&D

7 accelerators and more than 57,000 radiotherapy sessions every year

470,000 slides read by the pathology lab every year

A ranking for most indicators in the latest SCOPE Santé survey

15 organ coordination committees

To ensure every patient receives the most appropriate integrated care from diagnosis to after cancer, medical strategy decisions at the IUCT-Oncopole are taken by multidisciplinary committees (12 at the IUCT-O and 3 associate committees)

ITC-O-DCCs:
- Breast Cancer
- Gynecology
- Head and Neck Cancer
- Sarcomas
- Neuro-oncology
- Skin Cancers
- Urological Cancers
- Oncogenetics
- Oncoradiologists
- Supportive Care
- Hematology
- Endocrine & Thyroid Cancers
- Associate DCs:
- Thoracic Cancers
- Digestive Cancers
- Pediatric Cancers

INDUSTRIAL PARTNERSHIPS

- Several framework agreements with major companies in order to join international clinical research and oncoimmunology networks: ImCore, GECI and OTX.
- Licenses have also been issued giving companies limited access to databases.

INCa-accredited center for early phase clinical trials (CLIP²)

110 IUCT-O staff contribute to knowledge diffusion

1,100 students, including 200 interns and 70 doctoral students

37 student nationalities

14 associated Master’s degrees, including 1 Master’s in cancerology taught at the CRCT

24 professional training courses, plus 9 university diplomas

95 events organized by the IUCT-O every year

15 research teams (inc. 4 with CNRS accreditation)

430 researchers, clinicians and support staff

1 Regional Centre for Functional Exploration and Experimental Resources (CREFERS)

8 technical services units

33 collections preserved in the Biological Resource Center

2 integrated programs:
- Resistance mechanisms and new targets: from molecular pharmacology to clinical pharmacology
- Promote the use of mathematical, physical and bioinformatical approaches in oncology (Oncodevice)

110 myLittleTools platform

This platform provides e-learning modules and courses, including SPOCs and Serious Games, produced internally or in cooperation with other institutions (Université Toulouse III–Paul Sabatier, Institut Paul-Dubreuil, BPSL Croix Rouge, etc.). It also posts training courses and scientific events held at the IUCT-Oncopole.

PATIENT CARE

Industry partnerships

- Several framework agreements with major companies in order to join international clinical research and oncoimmunology networks: IMCARE, GECI and OTX.
- Licenses have also been issued giving companies limited access to databases.

Methodology support center

Two teams provide project support: data management & bio-statistics (research partnership with Toulouse School of Economics).

1,100 new patients treated every year

More than 2,600 patients receiving oral therapies

79% of patients receive their treatment as outpatients

7 operating rooms, including 1 devoted to R&D

7 accelerators and more than 50,000 radiotherapy sessions every year

470,000 slides read by the pathology lab every year

A ranking for most indicators in the latest SCOPE Santé survey

*Sport & Cancer* Center

- Since 2013, patients have been offered free, collective physical activity sessions, in conjunction with the CANA
- Stade Toulousain Rugby Club has supported this initiative since September 2018

110 IUCT-O staff contribute to knowledge diffusion

1,100 students, including 200 interns and 70 doctoral students

37 student nationalities

14 associated Master’s degrees, including 1 Master’s in cancerology taught at the CRCT

24 professional training courses, plus 9 university diplomas

95 events organized by the IUCT-O every year

MyLittleTools platform

This platform provides e-learning modules and courses, including SPOCs and Serious Games, produced internally or in cooperation with other institutions (Université Toulouse III–Paul Sabatier, Institut Paul-Dubreuil, BPSL Croix Rouge, etc.). It also posts training courses and scientific events held at the IUCT-Oncopole.

Lifelong training

In addition to its university functions, the IUCT-O contributes to continuing education and professional training through:

- continuous professional development courses,
- seminar cycles,
- other events held in the 300-seat amphitheater.

Simulations to train future medical personnel

- Use of mannequins to teach certain medical and nursing procedures
- Simulations with theater actors in order to learn how to communicate with patients.

21 research teams (inc. 4 with CNRS accreditation)

430 researchers, clinicians and support staff

1 Regional Centre for Functional Exploration and Experimental Resources (CREFERS)

8 technical services units

33 collections preserved in the Biological Resource Center

2 integrated programs:
- Resistance mechanisms and new targets: from molecular pharmacology to clinical pharmacology
- Promote the use of mathematical, physical and bioinformatical approaches in oncology (Oncodevice)
